Dear business partners  
and friends of MAC-SUN Travel,

We are pleased to present you our new catalogue for Sit in Couch Tours 2021. Especially the Balkan countries are still among the most prosperous regions in tourism. This is only partly, because these countries are the last remaining spots on the map of many group- and individual travelers, but also because many other countries in the world are not to be visited at the moment, due to internal conflicts. The MAC-SUN team will be happy to advise you about the different trips and arrangements.

For the sake of the environment, we have decided from this year on to publish only one catalogue with all country information and SIC tours.

You will find many more travel ideas on our website:

[www.macsun.travel](http://www.macsun.travel)

On this note, I would like to express my sincere gratitude for the good cooperation over the last 10 years and look forward to many new guests in the coming years.

Cordially Yours,

Ewald Koenig & Team

## Skopje – the pearl of the Balkans

Skopje, the capital of North Macedonia, is still a largely unknown travel destination. The city has about 750,000 inhabitants. Thus, about one third of all Macedonians live in the capital.

An earthquake on July 26, 1963, destroyed 70 percent of the buildings - Skopje was then rebuilt, receiving a partially "brutally modern" appearance. As part of the Skopje 2014 construction project, many buildings were erected in baroque style, a feast for the eyes that invites you to take a walk.

Worth seeing in Skopje is the charming old town in Ottoman style with narrow alleys, mosques, Ottoman baths (Hammam) and caravanserais. The Old Bazaar is a popular shopping and nightlife area. A delicious retreat offer the restaurants that sell kebab - grilled minced meat skewers.

The Old fortress (Kale) which rises on a hill above the city, is also worth a visit. Here you can enjoy beautiful views of the river Vardar and the local mountain Vodno.

Plenty of museums and galleries offer an insight into the rich history and art expressions of the land and city. The old railway station building from 1938, which partly survived the earthquake and is now also a memorial, is converted into a city museum exhibiting artefacts from the 5th millennium before Christ until today. Let yourself drift, stroll through the streets in the center and enjoy the special atmosphere of Skopje - far away from all the western tourist hustle and bustle.

Hike or drive on Skopje's local mountain, Vodno, rising clearly 1066 meters above the capital. If you feel more like enjoying than exercising, you can reach the imposing cross on the summit (a 66-meter high steel construction visible from 100 kilometers away) by a cable car. Also, a well-constructed road leads to the middle station.
